Company Registration No: 10982980

EPCs • Floor Plans • Legionella Risk Assessments • SAP & SBEM Calculations • Water Efficiency Calculations • Air Pressure Testing

## L2B (Conversion) SBEM Calculation - Data Collection Form

---

### Project Information

Building Address:

Edition of Building Regulations:

Current Stage of Project:

Building Type:

If 'other' please specify:

**Scaled Drawings are Required - Floor Plans (all floors) / Elevations / Section**

---

**Thermal Elements** (if detailed on drawings, please leave blank)

**Ground Floor Build Up (materials / insulation / type / thickness):**

**External Wall Build Up (materials / insulation / type / thickness):**

**Roof Build Up (materials / insulation / type / thickness):**

**Glazing & Door Type (double / triple / air gap (mm) / argon filled / U-value (if known) etc.):**

---

## Heating & Cooling System

Please provide mechanical drawings / tech subs / manufacturers literature (were available):

Type of Heating System:

Make & Model (if known at current stage):

Type of Mechanical Cooling System:

Make & Model (if known at current stage):

Main Heat Emitters:

---

## Hot Water System

Please provide mechanical drawings / tech subs / manufacturers literature (were available):

Type of Hot Water System:

Make & Model (if known at current stage):

Hot Water Storage Capacity (L) - If applicable:

Is there a time switch?

Yes

No

Secondary circulation loop length (m) - If applicable:

Pump Power (kW) - If applicable:

---

## Ventilation

Please provide mechanical drawings / tech subs / manufacturers literature (were available):

Type of Ventilation System:

Make & Model (if known at current stage):

Specific Fan Power (SFP) of unit (if known):

Are the windows openable?

Yes

No

Does the system incorporate heat recovery:

Make & Model (if known at current stage):

Yes

No

Air Pressure Test Result (As built assessments only) - Please provide a copy of the test certificate:

Any other HVAC information you feel relevant:

---

## Lighting

Please provide electrical drawings / tech subs / manufacturers literature (were available):

Type of Light Fittings:	What is the Luminaire Efficacy (Lm/W) of the fitting (if known):
Lighting Controls:	Does the system have Daylight Dimming controls?
	Yes
	No

---

## LZC Technologies

Please provide drawings / tech subs / manufacturers literature (were available):

Does the building incorporate any Renewable Technologies?	If 'other' please specify:
---	----------------------------

If so please provide specific details of the system:

---

## Additional Information

Does the building have Power Factor Correction (PFC)?

Yes

No

Does the building have provisions for Metering?

Yes

No

If 'Yes' - Does the Metering system warn for 'Out-Of-Range' values?

Yes

No

Any additional information you feel relevant to the project:
